Summary of Position

Upon assuming the Research Analyst position, the successful candidate will engage in cutting-edge research in collaboration with colleagues at Chandan Economics and our strategic partners. The Research Analyst position involves data collection and validation in support of Chandan Economics' databases, research on the performance of commercial real estate mortgages, and analysis of selected economic and financial market trends impacting the commercial real estate sector.

Essential Duties and Responsibilities

- Data collection and validation;
- Quantitative analysis of large datasets;
- Preparation of presentation materials;
- Planning and execution of research projects;
- Writing publishable research briefs; and,
- Supporting the Chief Economist in a variety of administrative and research activities.

Candidate Profile

- A recent undergraduate degree in economics, finance, or statistics;
- A demonstrated interest in commercial real estate;
- Strong research skills coupled with exceptional attention to detail;
- Excellent written and oral communication skills;
- Experience working with data and datasets;
- An ability to working independently in an entrepreneurial environment; and,
- Fluency in Excel and PowerPoint.

Please note that experience with STATA is desirable but is not a requirement for candidacy.

How to Apply

To apply for this position, please submit a brief cover letter, current resume, and an unofficial transcript to careers@chandan.com by November 15, 2011. Applications should be addressed to James Keenoy, Manager of Research Services. Though not required, candidates may submit up to one sample research paper and one faculty or professional letter of reference.
